STATE ENERGY INSTITUTE OF TURKMENISTAN

CHARTER OF THE CENTRE FOR INNOVATIVE EDUCATIONAL TECHNOLOGIES

General Provisions:

The Centre for Innovative Educational Technologies (referred to hereafter as “Centre”) is established in accordance with the work package plan of “Modernization of Higher Education in Central Asia through New Technologies” (HiEdTec) project of the Erasmus+ program.

In its activities, the Center is guided by the Law of Turkmenistan “On Education” and other regulatory legal acts of Turkmenistan, the Charter and internal regulations of the State Energy Institute of Turkmenistan.

Goals:

The Centre should promote:

- adaptation of the educational system to the digital generation through active and effective use of ICT-based innovative educational technologies, thereby contributing to the digital transformation of education;
- comprehensive development of e-learning methods, including digital textbooks, teaching aids, video and audio materials, interactive and multimedia programs;
- ensuring position of the university in the national and global educational space;
- stimulating scientific, technical and research activities of the teaching staff and university students.

Objectives:

The Centre should:

- assimilate innovative educational technologies, adapting them to the conditions of the university;
- conduct training in the field of innovative educational technologies;
- popularize innovative educational technologies, including virtual educational models through individual lectures, courses, seminars, etc.;
- present innovative educational technologies used at the university to expert groups, official guests at the national and international levels, etc.;
- conduct research that reveals real benefits of introduction of innovative educational technologies;

- participate in organization and conduct of national seminars and conferences on digital transformation of education;
- participate in organizing and holding national and international conferences in the field of digital transformation of education;
- provide all interested parties with advisory and methodological support in the use of innovative technologies;
- popularize activities in scientific and educational spaces, mass media, regional and national seminars, national and international conferences, social networks.

Structure:

The Centre should operate in cooperation with other divisions of the State Energy Institute of Turkmenistan, as well as with other educational and research institutions.

A responsible person appointed by the Rector of the institute should manage the Centre. The Head of the Centre organizes and controls activities of the Centre, ensures interaction with structural divisions of the institute and other organizations. The composition of the Centre is dynamic and may include teachers, undergraduates, and students of various faculties, with a demonstrated interest in the field of innovative educational technologies.

Financing:

In accordance with the legislation of Turkmenistan.
